

PATHOSEAL

SAMPLE TRANSPORT BAG

COMPONENT
PACKAGING

Intelsius offer a range of flexible secondary packaging ideal for the transportation of a variety of primary containers such as blood vials, swabs, blood collection bags and medical devices.

The PathoSeal 95 range is designed and tested to withstand a pressure difference of 95 kPa to meet UN3373 Biological Substance, Category B regulations.

The PathoSeal Liquitite range is designed and tested to meet Category B regulations when used in conjunction with 95 kPa primaries.

All PathoSeal products feature a simple closure system enabling ease of packing, plus the unique tamper evident seal ensures the integrity of samples. In addition the bags are sequentially numbered, providing a chain of custody and additional security. An external document pouch is also present for all sizes with the exception of PathoSeal 95 A6.

THIS PRODUCT CAN BE USED FOR

- Diagnostic samples
- Category B, Biological Substances
- Clinical trials
- Screening programmes
- Eradication schemes

FEATURES

- Suitable for use within Category B solutions
- Tamper evident seal
- Sequentially numbered for sample traceability
